40 million+
units
manufactured

Founded in 1997 in Coimbatore as a joint venture between UMS (India), Watertec (Malaysia), and South Asian Investments (Sri Lanka), Watertec pioneered engineering polymer bath fittings in India.

With the backing of global investor **Warburg Pincus** since 2023, Watertec has become a complete solutions provider across Polymer Bathware, Pipes & Fittings, CP Fittings and Sanitaryware.

Built on performance, reliability, and innovation, we offer leak-free, corrosion-free, and high-efficiency products that meet both functional and aspirational needs.

With over 40 million units manufactured, Watertec continues to lead by creating smarter, more durable and water-efficient solutions, helping life flow seamlessly, every day.

Polymer Bathware

Crafted using premium virgin-grade POM, Watertec's polymer bathware is built for style, strength and reliability. Equipped with 100% leak-free Super Seal Technology, our taps and mixers are made to withstand the demands of daily use, delivering seamless performance for years.

Pipes & Fittings

Engineered for behind-the-wall reliability, our pipes offer 100% leakproof performance and an operational life of 50 years. Features include: anti-slip, anti-bacterial, anti-pitting, anti-scaling, and fire-retardant properties, making them ideal for both residential and industrial use.

CP Fittings

Sleek, modern, and built to last, Watertec's CP Fittings are crafted from high-quality materials for superior finish and long-lasting performance. Perfectly suited for today's contemporary bath spaces, combining aesthetic elegance with functionality.

Sanitaryware

Watertec Sanitaryware offers a perfect balance of design, hygiene and performance. Equipped with dual flush, anti-bacterial protection and compact, odour-free designs, our products are made for clean, efficient living.

Certifications & Compliance

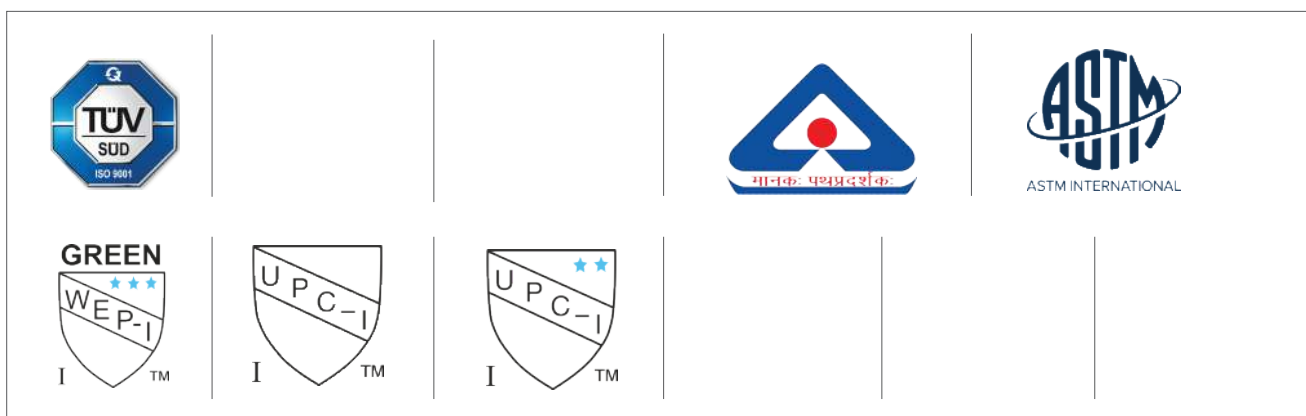

At Watertec, quality, safety, and sustainability are built into everything we do. We are proud to be an ISO 9001:2015-certified company, recognized by TÜV SÜD for our robust Quality Management System, demonstrating our commitment to delivering products that meet the highest global standards.

Our Key Certifications

- ISO 9001:2015 – Quality Management System
- ISO 14001:2015 – Environmental Management System
- ISO 45001:2018 – Occupational Health & Safety Management System

IAPMO Certifications

- Taps, Showers & Faucets – IN-W1058 (Water Efficiency Standards)
- Dual Concealed Flush Valve – IN-1095
- Plastic Cistern with Flush Mechanism (Regal Dual Flush) – IN-1085

The 'tec' in Watertec

At the heart of every Watertec product lies smart technology and superior materials, ensuring performance, reliability and lasting value.

POM: Premium Engineering Polymer

All Watertec polymer products are crafted using virgin-grade POM (Polyoxymethylene), an advanced engineering polymer used even in aircraft manufacturing.

Known for its exceptional strength, sleek finish and dimensional stability, POM enables our products to deliver unmatched durability and modern design precision.

Ceramic Cartridges with 96% Alumina

Our quarter-turn taps feature high-performance ceramic cartridges made with 96% Alumina discs, ensuring:

- Superior wear resistance
- Protection against water erosion
- Smooth, precise control
- Longer life as compared to rubber-based alternatives

These cartridges eliminate frequent replacements and provide consistent, tight sealing, every time.

Superseal Technology

Our proprietary Superseal Technology ensures 100% leakproof taps. Superseal technology reduces water wastage and maintenance.

Equipped with an integrated TPE washer, it delivers consistent performance even after 2 lakh + turns, making it one of the most reliable sealing systems in the category.

Dura Pro Technology

Developed for our Waterline, Sleek and Regal Cisterns, Dura Pro Technology stands for strength and trust.

With 1 lakh+ tested flush cycles and internal components made entirely of POM, it offers extended warranty:

> 4 Years for Waterline & Sleek

> 5 Years for Regal

This ensures long-lasting performance and peace of mind.

SQ SERIES

- Durable engineering polymer body
- Ceramic disc tested for 2 lakh+ cycles
- Bold, geometric design
- Wide lever for easy use
